

Concluded from First Page.  
be enabled to do much, to be punctual, to fulfill his promises, if they are judiciously made. Punctual labor will make punctual customers, and this man will grow rich, and in due time, when age requires rest, he will be able to be at leisure, leaving his business to others, while those of his age who were at leisure while he was busy, will be struggling still even under the infirmities of age for their daily bread.

A great mistake often made and fraught with the worst consequences is, that labor is discreditable to a gentleman. Nature says—there can truly be no gentleman without it. It is necessary to the existence, certainly to the perfection of the race in their proper relations here. It is necessary to wealth, comfort and happiness. It is the appointment of God himself—God made man a laborer. In every good sense of the term, which connects him with the interest of his race and the proper destiny of man; He made the laborer a gentleman and the gentleman a laborer. It has been said the devil made the gentleman, and this very vulgar expression is certainly graphic in truth whenever any man is tempted to believe that it is discreditable to work for a living, and that a gentleman is made by idleness. The term properly expresses a character, not a form or profession. He is a true gentleman, whose heart dictates a propriety of conduct in all the relations of life, and whose outward acts are the comely expressions of correct principles.

Our day is distinguished for expedients to improve and advance the human race. This is well. The effort is a noble one—worthy of man; and that is saying enough. But, like the efforts of the day on all other subjects, there is a strong tendency to fanaticism in the labors of those who seek human perfectibility by ordinary agencies and factitious schemes. Here, too, men seek for the philosopher's stone, some catholicon, a panacea which is to work miracles, some high pressure expedient for making gentlemen without labor, and securing the avails of labor without industry. After men are starved into the truth, they will find that nature cannot be well forced to make gentlemen. They must come in the regular way. As well might the doll-maker attempt to compete with nature. He may make a pretty thing. But he produces no living, breathing, thinking, useful being. So fashion may make a gentleman out of any dandy that walks on two feet instead of four; but it is a thing only fit to show in the windows of a toy shop, and had much better be left there for fools to gaze at, than be put into the hands of a young lady. We confer a real benefit, do something effectually to elevate the race, and make advances to the only real philosopher's stone which turns every thing it touches into gold, whenever we do any thing to render labor creditable to the man who engages in it. This we do, too, when the laborer is cheered on to perseverance in his efforts and attains to the wealth which is the proper result of industry.

Such men have been honored, are honored, must be honored, wherever they are found. Knowledge is power. The man who has it, other things being equal, will exert a controlling influence. He triumphs over matter. He controls the masses of men—their minds as well as their physical force. This it is which gives the great superiority to some men over others. They are sought out, and will occupy the high places of society. When these powers are directed to the melioration of human woes, those who exert and possess them, become, and are called, benefactors. Their names are inscribed on the catalogue of honored and honorable men. They do their part and do much to render labor reputable. Let the mass of working men then do their duty, and things will find their proper level.—The order of nature will be restored in the estimate men place on different professions and occupations of life. Among the nobility of nature, the farmer will hold the pre-eminence, first among equals. The mechanic next—and we shall all come in, not far behind indeed, but yet behind in our respective professions, forming eccentric circles; the one great human family around the soil whence we came, and from which we derive our subsistence while we live, and to which we are destined to return and repose in death.

A DEVOTED FEMALE.—Mrs. Fry, the distinguished female philanthropist, solemnly declared to her daughter in her last illness, "I can say one thing, since my heart was touched at the age of seventeen, I believe I never have awakened from sleep, in sickness or in health, by day or by night, without my first waking thought being how best I might serve my Lord."

Genius will never be neglected by the public unless it neglects itself; it must not disdain the humble alliance of industry. How can it expect encouragement, unless its existence can be manifested by performance? The surest evidence of superior talent is, that it forces itself into notice in spite of adverse circumstances, but it makes a road where it finds none.

**John D. Perry,**  
**WHOLESALE AND RETAIL**  
**GROCER,**

**Clemen's Indian Tonic.**  
Infalible Cure for CHILLS, or AGUE and FEVER, and a sure remedy in BILIOUS REMITTENT, and other FEVERS.  
THIS INVALUABLE MEDICINE IS PURELY VEGETABLE.

THE unexampled success of this truly unrivalled Tonic, in curing in a few hours, where all other remedies have failed, and that too, in cases from six months to ten years standing, warrants the assertion, that if taking according to directions, it is infallible. A long list of certificates in proof of its infallibility might be added, but those upon the wrapper are deemed sufficient. Try it and be convinced that it is the most pleasant, most certain, and the very BEST remedy ever offered to the public for putting a speedy termination to the Chills or Ague and Fever.

From the great popularity of this medicine, many imitations, professing to be CLEMEN'S INDIAN TONIC, are about. Therefore, be sure to ask for that prepared by GEO. W. HOUSE, Nashville, Tennessee, who is sole proprietor. CERTIFICATES.

NEAR NASHVILLE, August 18, 1843.  
Mr. Geo. W. House: Dear Sir—I had Chills and fever for twelve months, nine months of the time, without being able to check it, with all the aid I could procure from Physicians and the various Tonic Fever and Ague mixtures sold by the Drug stores. In April last I saw your advertisement of Clemen's Indian Tonic, as an infallible cure. I made no delay in calling upon you, and by using said Tonic, I found immediate relief, and a permanent cure. A friend of mine tried it about the same time, with the same happy result. Yours, respectfully,  
C. GLASSGOW.

From the Clarksville Chronicle, Oct. 21, 1843.  
Dr. T. D. Scott: Dear Sir—We have used Clemen's Indian Tonic in many cases of Ague and Fever, and we find it, in every particular, what it is commended to be in your advertisement. We have heretofore used most of the popular remedies in use for Fever and Ague, and we unhesitatingly recommend Clemen's Tonic to the confidence of the public, from our personal experience and observation, as a cure, certain, and prompt cure for the Ague and Fever, in any form or stage of the disease.  
Yours, &c.  
P. PEACHER.  
JAMES J. PRITCHETT,  
LEVI COLEMAN.

Extract of a letter from the Rev. F. A. OWEN to Memphis, dated Nov. 16, 1843.  
My Dear Sir—I have tried Clemen's Indian Tonic in six different cases, and find it efficacious in a very high degree. It arrested the chill in every instance, and as yet there has been no return. I cheerfully give this testimony, that others may be induced to use a remedy both safe and efficacious in curing chills and fever.  
Yours, very truly,  
F. A. OWEN.

NASHVILLE, June 3rd, 1844.  
Mr. Geo. W. House: Dear Sir—I shall make no apology in presenting the following remarkable case: A youth of about fifteen years old, living with me, had the Fever and Ague for ten years, without finding a cure, until I can assure you every means were used to that effect. In December last I tried a bottle of "CLEMEN'S INDIAN TONIC," which arrested the disease at once, and am happy to state, he has not had a chill or an ague since. You should lose no time in giving this Tonic an extensive circulation—it will prove a welcome friend and a great blessing to the afflicted.  
Yours, truly,  
JOHN H. DAVIS.

The above case is known to me, and is strictly true.

**Virginia Hotel.**  
Corner of Main and Green Streets, St. Louis, Mo.  
My friends and the public are respectfully informed, that I have taken a new Lease on the above named buildings, and during the last four months have been making improvements on the premises.

Viz: I have built a number of pleasant rooms, have made the dining room one third larger, and have finished it in a handsome manner. It is now the largest in the city and is well ventilated and can seat 200 guests.  
The Furniture of the House has been replenished throughout, and the premises generally improved by additions, alterations and repairs. The house being situated on the principal business street, and its principal public rooms, viz: (Bar, room, Office, Reading-room and Dining-room) on the ground floor, will commend itself to the public, as a desirable home whilst sojourning in our city, and I pledge myself that every exertion shall be used to render strangers comfortable whilst at the Virginia Hotel.  
JOHN H. SPARR, Proprietor.  
Sept. 16, 1848.—20m3.

**Medical Card.**

**COTTON YARN**—75 bags assorted Nos. cotton yarn just received and for sale by  
July 29 J. D. PERRY, Glasgow.

**Monthly Bulletin No. 9.**  
THE position of the Greenberg Company in its relation to the health of the community is now fully established; and the admirable series of Greenberg Medicines are everywhere taking the lead of all others. In numerous portions of the country the Medical Faculty adopt these medicines in their practice, satisfied, from ample tests, that by their use they can more certainly combat DISEASE IN ALL ITS FORMS. And not only do Physicians sanction and encourage their use, but the CLERGY, of every denomination, attest their wonderful efficacy; and in numerous ways recommend them to the people of their charge. THE LEGAL PROFESSION testify to the same thing, in short, the public at large hail the introduction of these medicines as a public blessing.

There are over TEN THOUSAND AGENCIES of the Company in the United States, which are not only profitable to the agents, but of vast benefit to the inhabitants. There should not be a single town, village, or hamlet, without its Greenberg Depot; and if this Bulletin is read where there is no agency, application should be made for one immediately.  
Certificates, almost without number, are on file at the office of the Company, testifying to cures of the most astonishing kind; many of which have been fully examined by the following distinguished gentlemen: Rev. N. Bangs, D. D., Francis Hall Esq., Ex-Mayor Brady, all of New York.  
The power of the Greenberg Medicines over all various complaints, no matter what their form or severity, is a matter of profound astonishment. Let all, therefore, who are thus afflicted, and who would cleanse the system, resort at once to the celebrated GRAFENBERG VEGETABLE PILLS AND HEALTH BITTERS. At all events let them call at some one of the agents and get a pamphlet gratis, which will fully explain the whole matter.

The General Agent for Missouri, and South part of Illinois, is E. K. WOODWARD, St. Louis, to whom applications for agencies may be addressed.  
EDWARD BARTON, Secretary.  
New York, September, 1848.  
Sub-agent, Wm. R. SNELSON, Fayette.

**Doct. A. S. Dinwiddie,**  
FAYETTE MO.

**Patent Concave Beater Churn.**  
WE call the attention of the public to the article heading this advertisement, and invite the enterprising and curious to call and witness its operation. All advertisement in relation to this invention, to the hundreds who have seen it tested, is supererogation.  
First. This Churn will produce butter, gathering it in a mass, from sweet milk, in five to ten minutes, and from cream prepared, as families usually prepare it, in three to five minutes.  
Second. The utility of this invention is apparent, as better butter can be produced from sweet milk, or cream, than cream soured in the usual way, and by means of this Churn, a little girl or boy can perform, in five or ten minutes, what has heretofore required the labor of a woman or man for one or two hours, and sometimes half a day.  
Third. By simply turning a thumb-screw, the whole inside dasher is taken out, leaving nothing but the butter and milk in the plain wooden box.  
Fourth. It is the cheapest Churn ever invented, as the simplicity of its construction (though embodying a great philosophical principle,) makes it but little to manufacture it.  
Fifth. It is a common sense Churn, as all will admit who will examine it.  
We are now offering the complete monopoly of this staple article in States and counties, which will insure certain and large profits and a speedy return of investments.  
COLVER & MYERS, 32, Vine st., up stairs  
St. Louis, October 5, 1848.—31m.

Front Street, Glasgow, Mo.  
31

**Patent Concave Beater Churn.**  
WE call the attention of the public to the article heading this advertisement, and invite the enterprising and curious to call and witness its operation. All advertisement in relation to this invention, to the hundreds who have seen it tested, is supererogation.  
First. This Churn will produce butter, gathering it in a mass, from sweet milk, in five to ten minutes, and from cream prepared, as families usually prepare it, in three to five minutes.  
Second. The utility of this invention is apparent, as better butter can be produced from sweet milk, or cream, than cream soured in the usual way, and by means of this Churn, a little girl or boy can perform, in five or ten minutes, what has heretofore required the labor of a woman or man for one or two hours, and sometimes half a day.  
Third. By simply turning a thumb-screw, the whole inside dasher is taken out, leaving nothing but the butter and milk in the plain wooden box.  
Fourth. It is the cheapest Churn ever invented, as the simplicity of its construction (though embodying a great philosophical principle,) makes it but little to manufacture it.  
Fifth. It is a common sense Churn, as all will admit who will examine it.  
We are now offering the complete monopoly of this staple article in States and counties, which will insure certain and large profits and a speedy return of investments.  
COLVER & MYERS, 32, Vine st., up stairs  
St. Louis, October 5, 1848.—31m.

**Doct. A. S. Dinwiddie,**  
FAYETTE MO.  
GRATEFUL for past patronage, still continues to offer his MEDICAL SERVICES to the citizens of Howard County.  
Office on the South East side of the public square, where he can usually be found in the day; at night—at his residence, 3d door below the Bank, Fayette, April 10th, 1847.

**Doct. James L. Dunn,**  
OFFERS his professional services to the citizens of Fayette and the surrounding country. Office on Griglar's row.  
August 5, 1848.
